

How many numbers between 1 and 40 can you make starting from the numbers 5 4 3 2 1 in that order and putting in  $\times$ ,  $\div$ ,  $+$ ,  $-$ , and brackets?

For example:  $1 = 5 - 4 + 3 - 2 - 1$   
 $2 = 5 - 4 + (3 - 2) \times 1$
